Industry Leader for Historic Restoration and Lead Abatement

LEAD STOP® Lead Encapsulating Compound is a thick elastomeric coating that is made to be a long lasting barrier over lead based paint. When applied according to directions, **LEAD STOP**® provides a protective barrier coat that seals and locks in lead that is contained in old lead based paints on previously painted surfaces. **LEAD STOP**® has earned a seal of approval for lead abatement from D.L. Litter Laboratories and the Commonwealth of Massachusetts Encapsulation Product Performance Protocol, Department of Public Health (Reg. #DL-10019) and meets the requirements of the US Department of Housing and Urban Development (H.U.D.), which spells out a 20-year manufacturers warranty. This product contains Bitrex anti-ingestant.

Easy Application

In order to obtain required dry mils thickness with a single application, spraying is recommended. When applying with a roller or brush, two coats may be required. Continually monitor coating thickness with a wet mil gauge. **ROLLER:** use a roller with 1/2" nap. **BRUSH:** Use good quality tapered brushes. **SPRAY APPLICATION:** For best results, airless spray application should be applied in one coat of between 14-16 mils wet per coat, which provides a smooth, dry film at this level. Use a .019 to .025 inch tip orifice and a 60 mesh filter. Be sure to use a organic vapor respirator to avoid tasting the anti-ingestant.

Innovative and Environmentally Safe Solutions from a Brand You Can Trust

Since 1981, DUMOND® has excelled in developing environmentally responsible products for the restoration industry. Today, the **LEAD STOP**® brand is recognized as the market leader of lead encapsulating compounds.

 **DUMOND**® *Providing the Support You Expect*

- A nationwide distribution network of conveniently located outlets.
- Sales Representatives located nationwide to provide hands-on support.
- Technical support via the internet for access to Specification & Data Pages and MSDS at www.dumondchemicals.com.
- Technical support via the phone from 8:30 am - 5:00 pm EST at **800-245-1191**
